

10 Minute Challenges - Summer 1 - Week 5 - 06/05/24

	<u>Challenge:</u>
Task 1	<p>We've noticed in recent weeks that as children have become more confident in their maths lessons and are striving to complete more and more work... some of the number formation has sadly suffered. This week, I'd like the children to go back to basics and again focus on correctly forming each digit; this way our presentation of our work will again match the amazing content.</p> <p>Copy.</p> 
Task 2	<p>This ½ term, now that we're becoming more confident with our 2, 5 and 10X tables I'd like us to start practicing on TT Rockstars. Login details can be found in the front of the children's home-learning diaries but if you need another copy please see myself or Mrs Wheatley.</p> <p><i>Our Rockstar of the week was Marcus after earning 706 coins with a massive 116 correct answers! Golden Ticket on the way to Marcus!</i></p> 
Task 3	<p>In class we've noticed that the children are very good at discussing and answering questions around stories that they have read multiple times e.g. in phonics or guided reading. However, we aren't as confident answering questions / discussing books / texts that we've read cold once. We will be continuing this ½ term with our 60 second reads and building in more opportunities for reading extracts in school.</p>

Advice from a Dentist

10 It is very important to take good care of your
19 teeth. Strong and healthy teeth will help you to
29 chew and eat the right foods that will help you
38 to grow big and strong. Healthy teeth help you
42 to speak clearly too.

51 Germs can stick to your teeth after you
58 eat and make something called plaque. Plaque
70 can cause holes to form in your teeth if it is not
77 brushed away regularly. Plaque can also make
87 your gums red and sore. If your gums are not
96 healthy, your teeth may start to wobble or fall
105 out. Make sure that you brush your teeth at
114 least twice per day to keep your mouth clean
116 and fresh.

Questions

1. What can plaque do to your teeth?

2. Which **two** adjectives has the author used to describe how plaque can make your gums?

3. What might you find difficult if your gums are not healthy?

4. Number these sentences from 1 to 3 to show the order they appear in the text.

Healthy teeth help you to speak clearly.

Plaque can make your gums red and sore.

Brush your teeth at least twice per day.

Task
4

Our show & tell 10-minute-challenge will continue to embed the knowledge from our Spring 2 topic. In the third week of our topic we learnt about teeth. We learnt about the importance of correctly brushing our teeth twice a day as well as the effect of some foods on the health of our teeth.

This week I'd like you to complete an experiment around sugary drinks. Place a hard boiled egg in a sugary drink of your choice (a dark coloured one that rhymes with poke will probably work best).

Make a prediction, draw your experiment and write your findings from your observations. Note: make sure you allow your egg to soak for 2 - 3 days at least in your chosen liquid or liquids.

Share your findings with the class at Friday's show & tell but be ready to explain...

What is this experiment teaching us about the effect of sugary drinks on our teeth?
